-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 April 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Applicant's arguments with respect to election of species requirement have been considered but are moot in view of the new ground(s) of restriction.

Claims 55, 115, and 116 are generic to the following disclosed patentably distinct species:

- Species I: The apparatus for producing electromagnetic radiation having specific insulation surrounding flow generator.
- Species II: The apparatus for producing electromagnetic radiation having specific structure of cathode and anode.
- Species III: A system having plurality of apparatus for producing electromagnetic radiation.
- Species IV: The apparatus for producing electromagnetic radiation having conductive reflector.
- Species V: The apparatus for producing electromagnetic radiation having exhaust chamber extending beyond electrodes.
- Species VI: The apparatus for producing electromagnetic radiation having power supply in communication with electrodes.
- Species VII: The apparatus for producing electromagnetic radiation having cooling system.
- Species VIII: The apparatus for producing electromagnetic radiation having removal device.

Art Unit: 2879

The inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). For example, the species III is mutually exclusive from other species because a system comprising plurality of apparatuses can be either configured to irradiate a common target or different targets.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
